# CONTENTS OF VOLUME 63

## Number 1

| | | |
|---|---|---|
| G. Spadaro | 1 | Foreward |
| C. Decker and K. Zahouily | 3 | Photostabilization of polymeric materials by photoset acrylate coatings |
| Z. P. Zagórski | 9 | Modification, degradation and stabilization of polymers in view of the classification of radiation spurs |
| James V. Crivello | 21 | Advanced curing technologies using photo- and electron beam induced cationic polymerization |
| F. Martellini, L. H. I. Mei, J. L. Baliño and M. Carenza | 29 | Swelling and water transport in temperature-sensitive hydrogels based on 2-methoxyethylacrylate |
| T. Seguchi, T. Yagi, S. Ishikawa and Y. Sano | 35 | New material synthesis by radiation processing at high temperature—polymer modification with improved irradiation technology |
| E. Takács, K. Dajka and L. Wojnárovits | 41 | Study of high-energy radiation initiated polymerization of butyl acrylate |
| G. Caputo, A. Galia, F. Scrò, G. Spadaro and G. Filardo | 45 | Gamma radiation induced polymerization of vinyl monomers in dense $CO_2$ |
| S. S. Emmi, E. Takács, P. Ceroni, M. D'Angelantonio, M. Lavalle, P. G. Fuochi and A. Kovács | 53 | Formation of radical cations and dose response of α-terthiophene-cellulose triacetate films irradiated by electrons and gamma rays |
| Munehiro Kozuka, Takeyuki Sone, Masayoshi Tabata, Yoshikazu Sadahiro and Takeaki Enoto | 59 | Radiation-induced *Cis* to *Trans* isomerization of poly(*n*-butylpropiolate) prepared with a $[Rh(norbornadiene)Cl]_2$ complex as a stereospecific catalyst |
| D. Cangialosi, P. Fuochi, M. Lavalle, P. T. McGrail, G. Emmerson and G. Spadaro | 63 | Electron beam induced polymerisation of MMA in the presence of rubber: a novel process to produce tough materials |
| C. Dispenza, F. Scrò, A. Valenza and G. Spadaro | 69 | High energy radiation cure of resin systems for structural adhesives and composite applications |
| A. A. Zezin and V. I. Feldman | 75 | Formation and reactions of paramagnetic species in irradiated microheterogeneous copolymer systems with different electronic characteristics of components |
| A. A. Basfar, M. M. Abdel-Aziz and S. Mofti | 81 | Influence of different curing systems on the physico-mechanical properties and stability of SBR and NR rubbers |
| L. Torrisi | 89 | Radiation damage in polyvinyitoluene (PVT) |
| B. Ravat, B. Oudot, M. Grivet, Y. Grohens and A. Chambaudet | 93 | Electron irradiation of polyurethane using UV spectroscopy, GPC and swelling analyses |
| J. J. Murphy, M. Patel, S. J. Powell and P. F. Smith | 101 | Volatile evolution induced by energetic $He^{++}$ ions in a poly(ester) based polyurethane |
| C. Fernández Degiorgi, R. A. Pizarro, E. E. Smolko, S. Lora and M. Carenza | 109 | Hydrogels for immobilization of bacteria used in the treatment of metal-contaminated wastes |

## Number 2

| | | |
|---|---|---|
| S.A. Novikov and A.N. Hopersky | 115 | Two-photon excitation/ionization of the 1s-shell of the argon atom |
| W.T. Elam, B.D. Ravel and J.R. Sieber | 121 | A new atomic database for X-ray spectroscopic calculations |
| Edgardo V. Bonzi and Raúl A. Barrea | 129 | Measurements of L X-ray fluorescence cross sections for rare earths at 15.2 keV |
| *Book reviews* | | |
| Philip John Duke and Adolfo Esposito | 135 | Synchrotron radiation (production and properties) |

| | | |
|---|---|---|
| Chenyang Zhao, Yimin Shi, Wenfeng Wang, Weizhen Lin, Botao Fan, Zhongjian Jia, Side Yao and Rongliang Zheng | 137 | Fast repair activities of quercetin and rutin toward dGMP hydroxyl radical adducts |
| Suguru Miura, Noboru Kubota, Hidetaka Kawakita, Kyoichi Saito, Kazuyuki Sugita, Kohei Watanabe and Takanobu Sugo | 143 | High-throughput hydrolysis of starch during permeation across α-amylase-immobilized porous hollow-fiber membranes |
| Seiko Nakagawa and Toshinari Shimokawa | 151 | Degradation of halogenated carbons in alkaline alcohol |
| E. Janata, M. Kelm and B.G. Ershov | 157 | Solubility of oxygen and nitrous oxide in aqueous solutions of NaCl: a pulse radiolysis study |
| J. Mayer and T. Szreder | 161 | Electron transfer in pulse irradiated polypropylene film containing irganox type antioxidant |
| Yang-Soo Won, Do-Hung Han, Tatiana Stuchinskaya, Wan-Sik Park and Hong-Seung Lee | 165 | Electron beam treatment of chloroethylenes/air mixture in a flow reactor |
| F. Ziaie, Z. Zimek, S. Bulka, H. Afarideh and S.M. Hadji-Saeid | 177 | Calculated and measured dose distribution in electron and X-ray irradiated water phantom |
| N. Acar | 185 | Radiation synthesis of poly(2-vinylpyridine) gels and their swelling characteristics |
| Tatsuro Matsui, Tadao Takano, Shigeru Takayama, Masayuki Ito and Ikuo Narisawa | 193 | Degradation of crosslinked polyethylene in water by gamma-irradiation |

**Numbers 3–6**

| | | |
|---|---|---|
| Theo Sadat, Dieter Ehlermann and Arne Miller | 201 | Editorial |
| Theo Sadat | 203 | The 12th IMRP—International Meeting on Radiation Processing, 25 to 30 March 2001 in Avignon |

## OPENING SESSION

| | | |
|---|---|---|
| Adolphe Chapiro | 207 | XIIth international meeting on radiation processing Avignon 25–30 March 2001 (Polymer irradiation: past–present and future) |
| J.F. Diehl | 211 | Food irradiation—past, present and future |
| R.F. Morrissey and C.M. Herring | 217 | Radiation sterilization: past, present and future |

## CHALLENGING APPLICATIONS

| | | |
|---|---|---|
| Wang Ying and Gu yong-bao | 223 | Research on radiation-induced color change of white topaz |
| Yu.A. Zaykin and B.A. Aliyev | 227 | Radiation effects in high-disperse metal media and their application in powder metallurgy |
| S. Baccaro, A. Cecilia, G. Chen, J. Mares, E. Mihokova, M. Nikl, P. Polato, G. Zanella and R. Zannoni | 231 | Effect of γ irradiation on optical properties of $Ce^{3+}$-doped phosphate and silicate scintillating glasses |
| J.F. Calmet, F. Carlin, T.M. Nguyen, S. Bousquet and P. Quinot | 235 | Irradiation ageing of CSPE/EPR control command electric cables. Correlation between mechanical properties and oxidation |
| Guillermina Burillo, Pedro Herrera-Franco, Margarito Vazquez and Esbaide Adem | 241 | Compatibilization of recycled and virgin PET with radiation-oxidized HDPE |
| A.V. Telnov, N.V. Zavyalov, Yu.A. Khokhlov, N.P. Sitnikov, M.L. Smetanin, V.P. Tarantasov, D.N. Shadrin, I.V. Shorikov, A.L. Liakumovich and F.K. Miryasova | 245 | Radiation degradation of spent butyl rubbers |
| Ming-Sheng Yang, Charng-Cherng Chyau, Deng-Tsen Horng and Jui-Sen Yang | 249 | Effects of irradiation on epidermis ultrastructure of fresh day-lily flowers |
| Edward Iller, Aleksandra Kukiełka, Halina Stupińska and Włodzimierz Mikołajczyk | 253 | Electron-beam stimulation of the reactivity of cellulose pulps for production of derivatives |

| | | |
|---|---|---|
| **M.M. Rizzo, L.D.B. Machado, S.I. Borrely, M.H.O. Sampa, P.R. Rela, J.P.S. Farah** and **R.I. Schumacher** | 259 | Effects of gamma rays on a restored painting from the XVIIth century |
| **M.E. Gonzalez, A.M. Calvo** and **E. Kairiyama** | 263 | Gamma radiation for preservation of biologically damaged paper |

## LIABILITY AND PROCESS CONTROL

| | | |
|---|---|---|
| **Xinzhi Zhou, Yong Zhou, Youyi Zhou** and **Qiang Tang** | 267 | The electron dose monitoring and control system in EB radiation processing for wires and cables |
| **Joseph Borsa, Rod Chu, Jiansheng Sun, Nick Linton** and **Craig Hunter** | 271 | Use of CT scans and treatment planning software for validation of the dose component of food irradiation protocols |

## FOOD: REGULATORY STATUS

| | | |
|---|---|---|
| **D.A.E. Ehlermann** | 277 | Current situation of food irradiation in the European Union and forthcoming harmonization |
| **Kim M. Morehouse** | 281 | Food irradiation—US regulatory considerations |
| **Gary James Luckman** | 285 | Food irradiation: regulatory aspects in the Asia and Pacific region |
| **Raymond W. Durante** | 289 | Food processors requirements met by radiation processing |

## FOOD: CURRENT ISSUES

| | | |
|---|---|---|
| **Mahdi T. Al-Kaisey, Mahmoud A. Mohammed, Abdul-Kader H. Alwan** and **Manal H. Mohammed** | 295 | The effect of gamma irradiation on the viscosity of two barley cultivars for broiler chicks |
| **B. Ouattara, M. Giroux, R. Yefsah, W. Smoragiewicz, L. Saucier, J. Borsa** and **M. Lacroix** | 299 | Microbiological and biochemical characteristics of ground beef as affected by gamma irradiation, food additives and edible coating film |
| **B. Ouattara, S.F. Sabato** and **M. Lacroix** | 305 | Use of gamma-irradiation technology in combination with edible coating to produce shelf-stable foods |
| **M. Beaulieu, G. D'Aprano** and **M. Lacroix** | 311 | Effect of dose rate of gamma irradiation on biochemical quality and browning of mushrooms *Agaricus bisporus* |
| **M.L. Lacroix, W. Smoragiewicz, M. Jobin, B. Latreille** and **K. Krzystyniak** | 317 | The effect of irradiation of fresh pork loins on the protein quality and microbiological changes in aerobically—or vacuum-packaged |
| **Masakazu Furuta, Masahito Oka** and **Toshio Hayashi** | 323 | Radiation sterilization of enzyme hybrids with biodegradable polymers |
| **Sandra Wirkner, Katsutada Takahashi, Masakazu Furuta** and **Toshio Hayashi** | 327 | Calorimetric study on the effect of $^{60}$Co $\gamma$-rays on the growth of microorganisms |
| **Fernando F. Vieira** and **Nelida L. Del Mastro** | 331 | Comparison of $\gamma$-radiation and electron beam irradiation effects on gelatin |
| **Kátia I. Sebastião, Lgia B. Almeida-Muradian, Maria Fernanda Romanelli, Paula Massae Koseki** and **Anna Lúcia C.H. Villavicencio** | 333 | Effect of gamma-irradiation on the levels of total and *cis/trans* isomers of beta-carotene in dehydrated parsley |
| **Mônica S. Brito, Anna Lúcia C.H. Villavicencio** and **Jorge Mancini-filho** | 337 | Effects of irradiation on *trans* fatty acids formation in ground beef |
| **Marco Antonio P. Queirol, João Tessarioli Neto, Valter Arthur, Frederico M. Wiendl** and **Anna Lucia C.H. Villavicencio** | 341 | Gamma radiation, cold and four different wrappings to preserve ginger rhizomes, *Zingiber officinallis* Roscoe |
| **J. Farkas, K. Polyák-Fehér, É. Andrássy** and **L. Mészáros** | 345 | Improvement of microbiological safety of sous-vide meals by gamma radiation |
| **Setsuko Todoriki, Olivia Kimiko Kikuchi, Motoko Nakaoka, Mika Miike** and **Toru Hayashi** | 349 | Soft electron (low energy electron) processing of foods for microbial control |

| | | |
|---|---|---|
| Andrea Harumi Matsuda, Luci Brocardo Machado and Nélida Lucia del Mastro | 353 | Thermal analysis applied to irradiated propolis |
| S.F. Sabato and M. Lacroix | 357 | Radiation effects on viscosimetry of protein based solutions |
| Myung-Woo Byun, Ju-Woon Lee, Hong-Sun Yook, Kyong-Haeng Lee and Hee-Yun Kim | 361 | Improvement of shelf stability and processing properties of meat products by gamma irradiation |
| Cheorun Jo, Ju-Woon Lee, Kyung-Hwan Cho, Hong-Sun Yook and Myung-Woo Byun | 365 | Quality properties of sausage made with gamma irradiated natural casing from intestine of pork or lamb |
| Myung-Woo Byun, Ju-Woon Lee, Hong-Sun Yook, Cheorun Jo and Hee-Yun Kim | 369 | Application of gamma irradiation for inhibition of food allergy |
| W. Migdal and H.B. Owczarczyk | 371 | Radiation decontamination of meat lyophylized products |
| Lourdes Arevalo, Ma. Emilia Bustos and Cresenciano Saucedo | 375 | Changes in the vascular tissue of fresh Hass avocados treated with cobalt 60 |
| Ma.Ángeles Valdivia, Ma.Emilia Bustos, Javier Ruiz and Luisa F. Ruiz | 379 | The effect of irradiation in the quality of the avocado frozen pulp |
| T. Marfak | 383 | Feasibility study of a commercial irradiation plant in Morocco |
| Anuradha Prakash, Jacqueline Manley, Suresh DeCosta, Fred Caporaso and Denise Foley | 387 | The effects of gamma irradiation on the microbiological, physical and sensory qualities of diced tomatoes |
| D.M. Foley, A. Dufour, L. Rodriguez, F. Caporaso and A. Prakash | 391 | Reduction of *Escherichia coli* 0157:H7 in shredded iceberg lettuce by chlorination and gamma irradiation |
| James H. Moy and Lyle Wong | 397 | The efficacy and progress in using radiation as a quarantine treatment of tropical fruits—a case study in Hawaii |

## FOOD: IDENTIFICATION

| | | |
|---|---|---|
| H.M. Khan, Ijaz A. Bhatti and Henry Delincée | 403 | Thermoluminescence of contaminating minerals for the detection of radiation treatment of dried fruits |
| Ashfaq A. Khan, Hasan M. Khan and Henry Delincée | 407 | Detection of radiation treatment of beans using DNA comet assay |
| Hyung-Wook Chung, Henry Delincée and Joong-Ho Kwon | 411 | The application of different detection methods for irradiated dried anchovy and shrimp |
| Joong-Ho Kwon, Jaeyoung Jeong and Hyung-Wook Chung | 415 | Thermoluminescence characteristics of minerals from irradiated potatoes of different origins of production |
| Nélida Simona Marin-Huachaca, Maria Tereza Lamy-Freund, Jorge Mancini-Filho, Henry Delincée and Anna Lúcia C.H. Villavicencio | 419 | Detection of irradiated fresh fruits treated by e-beam or gamma rays |
| Adilson C. Barros, Maria Teresa L. Freund, Ana Lúcia C.H. Villavicencio, Henry Delincée and Valter Arthur | 423 | Identification of irradiated wheat by germination test, DNA comet assay and electron spin resonance |
| W. Stachowicz, K. Malec-Czechowska, A.M. Dancewicz, Z. Szot and A.G. Chmielewski | 427 | Accredited laboratory for detection of irradiated foods in Poland |
| Henry Delincée, Christiane Soika, Péter Horvatovich, Gerhard Rechkemmer and Eric Marchioni | 431 | Genotoxicity of 2-alkylcyclobutanones, markers for an irradiation treatment in fat-containing food—Part I: cyto- and genotoxic potential of 2-tetradecylcyclobutanone |
| Henry Delincée and Christiane Soika | 437 | Improvement of the ESR detection of irradiated food containing cellulose employing a simple extraction method |
| Henry Delincée | 443 | Rapid detection of irradiated frozen hamburgers |
| Eric Marchioni, Peter Horvatovich, Bara Ndiaye, Michel Miesch and Claude Hasselmann | 447 | Detection of low amount of irradiated ingredients in non-irradiated precooked meals |
| Makoto Miyahara, Akiko Saito, Hitoshi Ito and Masatake Toyoda | 451 | Identification of low level gamma-irradiation of meats by high sensitivity comet assay |
| Henry Delincée | 455 | Analytical methods to identify irradiated food—a review |

## POLYMERS: CURING

| | | |
|---|---|---|
| **John L. Garnett, Loo-Teck Ng, Duc Nguyen, Salesh Swami** and **Elvis F. Zilic** | 459 | CT complexes in radiation polymerisation processes including grafting, curing and hydrogel formation |
| **A.C. Mesquita, M.N. Mori, J.M. Vieira** and **L.G. Andrade e. Silva** | 465 | Vinyl acetate polymerization by ionizing radiation |
| **Bo Jiang, Lixing Yang, Yong Zhou, Guanglin Huang** and **Libin Lin** | 469 | Hybrid polymerization of iso-butyl vinyl ether |
| **N.G. Salleh, H.J. Gläsel** and **R. Mehnert** | 475 | Development of hard materials by radiation curing technology |
| **C.S.B Ruiz, L.D.B. Machado, E.S. Pino** and **M.H.O Sampa** | 481 | Characterization of a clear coating cured by UV/EB radiation |
| **E. Takács, K. Dajka, L. Wojnárovits** and **S.S. Emmi** | 485 | Pulse radiolysis study of the initial steps of the polymerization of cyclohexyl acrylate and cyclohexyl methacrylate |
| **A.B. Lugao, E.C.L. Cardoso, B. Hutzler, L.D.B. Machado** and **R.N. Conceicão** | 489 | Temperature dependent oxidative-induction time (TOIT) of irradiated and non-irradiated polypropylene—a new method |

## POLYMERS: CROSSLINKING

| | | |
|---|---|---|
| **W. Feng, F.M. Hu, L.H. Yuan, Y. Zhou** and **Y.Y. Zhou** | 493 | Radiation crosslinking of polyamide 610 |
| **Yan Aoshuang, Guo Zhengtao, Li Li, Zhai Ying** and **Zhou Peng** | 497 | The mechanical properties of radiation-vulcanized NR/BR blending system |
| **Jiuqiang Li, Jing Peng, Jinliang Qiao, Dongbin Jin** and **Genshuan Wei** | 501 | Effect of gamma irradiation on ethylene–octene copolymers |
| **A.A. Basfar** | 505 | Flammability of radiation cross-linked low density polyethylene as an insulating material for wire and cable |
| **Ademar B. Lugao, Lucia Noda, Elisabeth.C.L. Cardoso, Beatriz Hustzler, Shinichi Tokumoto** and **Ana Nery F. Mendes** | 509 | Temperature rising elution fractionation, infra red and rheology study on gamma irradiated HMSPP |

## POLYMERS: BIOMEDICAL

| | | |
|---|---|---|
| **Detlef Müller-Schulte** and **Michel Hodenius** | 513 | High performance DNA separation media using synergistic radiation grafting |
| **S.C. Cheng, W. Feng, I.I. Pashikin, L.H. Yuan, H.C. Deng** and **Y. Zhou** | 517 | Radiation polymerization of thermo-sensitive poly (*N*-vinylcaprolactam) |
| **Hiroshi Nakayama, Isao Kaetsu, Kumao Uchida, Shoei Sakata, Kazuhide Tougou, Takamichi Hara** and **Yoshio Matsubara** | 521 | Radiation curing of intelligent coating for controlled release and permeation |
| **Pengfei Liu, Maolin Zhai, Jiuqiang Li, Jing Peng** and **Jilan Wu** | 525 | Radiation preparation and swelling behavior of sodium carboxymethyl cellulose hydrogels |
| **Ireneusz Janik** and **Janusz M. Rosiak** | 529 | Radiation cross linking and scission of poly(vinyl methyl ether) in aqueous solution |
| **Piotr Ulański, Sławomir Kadłubowski** and **Janusz M. Rosiak** | 533 | Synthesis of poly(acrylic acid) nanogels by preparative pulse radiolysis |
| **Darmawan Darwis, Przemyslaw Stasica, Mirzan T. Razzak** and **Janusz M. Rosiak** | 539 | Characterization of poly(vinyl alcohol) hydrogel for prosthetic intervertebral disc nucleus |
| **Ademar B. Lugão, Sizue O. Rogero** and **Sônia M. Malmonge** | 543 | Rheological behaviour of irradiated wound dressing poly(vinyl pyrrolidone) hydrogels |

## POLYMERS: COMPOSITES

| | | |
|---|---|---|
| **Yu.A. Zaykin** and **U.P. Koztaeva** | 547 | Radiation resistance and structural transitions in polymer-based composites irradiated by electrons |

Anthony J. Berejka and Cliff Eberle 551 Electron beam curing of composites in North America

Li Fengmei, Bao Jianwen, Chen Xiangbao, Bao Huaying and Wang Huiliang 557 Factors influencing EB curing of epoxy matrix

## GAMMA TECHNOLOGY

V.G. Shevchenko, Y.V. Garoussov, V.I. Lebedev and V.V. Dmitriev 563 Practical results of $^{60}Co$ production at RBMK-reactors

Dan McKinney, Robert Perrins, Wayne Gibson and Daniel Levesque 567 Brevion: the new small-scale industrial gamma irradiator

Robert Aubé and Mike Wynnyk 571 Breathing new life into your production irradiator the case for reinvesting in your facility

## ELECTRON & X-RAY TECHNOLOGY

D.A. Cleghorn, S.V. Nablo, D.N. Ferro and D.W. Hagstrum 575 Electron beam treatment parameters for control of stored product insects

Douglas E. Weiss, Denise A. Cleghorn and Sam V. Nablo 581 Electron beam process validation for sterilization of complex geometries

Theo Sadat and Thomas Huber 587 E-Beam—a new transfer system for isolator technology

A. Lisitsky, S. Pismenesky, G. Popov and V. Rudychev 591 Quality improvement of irradiating technique

J. Bigolas, S. Kulinski, W. Maciszewski, M. Pachan, E. Plawski and Z. Zimek 595 Current approach to design of high-power electron accelerators to match actual requirements of radiation technology in Poland

S. Pismenesky, G. Popov and V. Rudychev 601 Reproduction of a given particle distribution by means of scanner

Kenneth P. Felis, Tovi Avnery and Anthony J. Berejka 605 Innovative energy efficient low-voltage electron beam emitters

D.A.E. Ehlermann and D. Morriseau 609 Re-commissioning of an electron accelerator: industrial-type in research style

V.L. Auslender, A.A. Bryazgin, B.L. Faktorovich, V.A. Gorbunov, E.N. Kokin, M.V. Korobeinikov, G.S. Krainov, A.N. Lukin, S.A. Maximov, V.E. Nekhaev, A.D. Panfilov, V.N. Radchenko, V.O. Tkachenko, A.A. Tuvik and L.A. Voronin 613 Accelerators for E-beam and X-ray processing

## EMERGING TECHNOLOGIES

R.F. Zaykina, Yu.A. Zaykin, G. Mirkin and N.K. Nadirov 617 Prospects for irradiation processing in the petroleum industry

R.F. Zaykina, Yu.A. Zaykin, T.B. Mamonova and N.K. Nadirov 621 Radiation methods for demercaptanization and desulfurization of oil products

T. Kume, N. Nagasawa and F. Yoshii 625 Utilization of carbohydrates by radiation processing

S. Hava and N. Pinhas 629 Optical properties tuning of quantum-well lasers and photodiodes through $\gamma$-ray irradiation

## ENVIRONMENTAL APPLICATIONS

Huaying Bao, Yuanxia Liu and Haishun Jia 633 A study of irradiation in the treatment of wastewater

J. Licki, A.G. Chmielewski, Z. Zimek, B. Tymiński and S. Bułka 637 Electron beam process for $SO_2$ removal from flue gases with high $SO_2$ content

V.L. Auslender, A.A. Ryazantsev and G.A. Spiridonov 641 The use of electron beam for solution of some ecological problems in pulp and paper industry

| | | |
|---|---|---|
| C.L. Duarte, M.H.O. Sampa, P.R. Rela, H. Oikawa, C.G. Silveira and A.L. Azevedo | 647 | Advanced oxidation process by electron-beam-irradiation-induced decomposition of pollutants in industrial effluents |
| A.G. Chmielewski, A. Ostapczuk, Z. Zimek, J. Licki and K. Kubica | 653 | Reduction of VOCs in flue gas from coal combustion by electron beam treatment |
| Ding Yonghua, Zheng Degui, Yan Aoshuang and Niu Guanghua | 657 | The present status and trend of ionizing-radiation application on environment protection in China |
| G. Albarrán and R.H. Schuler | 661 | Micellar electrophoretic capillary chromatographic analysis of the products produced in the radiolytic oxidation of toluene and phenol |

## STERLIZATION: MEDICAL DEVICES

| | | |
|---|---|---|
| Arne Miller and Joyce Hansen | 665 | Revision of the ISO and EN radiation sterilization standards |
| Aoshuang Yan, Ailian Wang, Ying Zhai, Ben Chen and Boon Lim | 669 | Setting the sterilization dose for a cotton-based product family using a knowledge of the distribution of radiation resistances |
| Zbigniew Zimek and Iwona Kaluska | 673 | Sterilization dose auditing for various types of medical products |

## STERILIZATION: PHARMACEUTICALS

| | | |
|---|---|---|
| Li Fengmei, Xie Ying, Deng Xixian, Zhou Xuan and Chen Dianhua | 675 | Kinetics study on dismutation of superoxide anion catalyzed by Cu(GlyGly) by using pulse radiolysis |
| Paula M. Koseki, Anna Lúcia C.H. Villavicencio, Mônica S. Brito, Ligia C. Nahme, Kátia I. Sebastião, Paulo R. Rela, Ligia B. Almeida-Muradian, Jorge Mancini-Filho and Paulo C.D. Freitas | 681 | Effects of irradiation in medicinal and eatable herbs |
| Hiroyuki Kamakura, Takeshi Hirano, Hitoshi Ito, Hiromi Sunaga, Haruki Takizawa, Yasuyuki Takatani, Setsuko Sekita and Motoyoshi Satake | 685 | Studies on the sterilization methods for the crude drugs. Possibility of EB machine for decontamination of crude drugs and influence on the components of crude drugs by irradiation |
| Vyacheslav A. Shkurupiy, Vladimir A. Krasnov, Elena P. Gulyaeva, Alexander V. Troitskiy, Oleg V. Grishin, Ludmila A. Bogdanova, Tatyana V. Machneva, Vadim L. Auslender and Mikhail V. Korobeinikov | 691 | Production of new antituberculosis drug and other medical preparations by electron beam treatment |
| Dušan Ražem and Branka Katušin-Ražem | 697 | Dose requirements for microbial decontamination of botanical materials by irradiation |
| Pascale Moyne, Alain Botella, André Peyrouset and Louis Rey | 703 | Sterilization of injectable drugs solutions by irradiation |
| J. Raffi, S. Gelly, P. Piccerelle, P. Prinderre, A. Chamayou and M. Baron | 705 | Electron spin resonance—thermoluminescence studies on irradiated drugs and excipients |
| J.C. May, L. Rey and Chi-Jen Lee | 709 | Evaluation of some selected vaccines and other biological products irradiated by gamma rays, electron beams and X-rays |

## DOSIMETRY

| | | |
|---|---|---|
| Hasan M. Khan, Mohammad Anwer and Zahid S. Chaudhry | 713 | Dosimetric characterisation of aqueous solution of brilliant green for low-dose food irradiation dosimetry |
| Ana M.Sisti Galante, Barbara M. Rzyski, Leticia L. Campos and Anna L. Villavicencio | 719 | The response of potassium nitrate for high-dose radiation dosimetry |

| | | |
|---|---|---|
| Yong Zhou, Xinzhi Zhou, Zhu An, Youyi Zhou and Shiming Wang | 723 | Measurements and calculations of electron dose distributions in circular materials |
| Marshall Cleland, Richard Galloway, Frederic Genin and Mikael Lindholm | 729 | The use of dose and charge distributions in electron beam processing |
| Peter Gehringer and Helmut Eschweiler | 735 | Electron beam dosimetry in aqueous flow systems |
| A. Miller, A. Kovacs and F. Kuntz | 739 | Development of polystyrene calorimeter for application at electron energies down to 1.5 MeV |
| Kishor Mehta, Piergiorgio Fuochi, Marco Lavalle and András Kovács | 745 | Behaviour of non-conducting plastics under e-beam irradiation |
| M.K. Murphy, S.D. Miller, A. Kovács, W.L. McLaughlin and I. Slezsák | 751 | Characterization of a new photo-fluorescent film dosimeter for high-radiation dose applications |
| A.I. Kalinichenko and G.F. Popov | 755 | Non-disturbing thermoacoustic dosimetry of electron and bremsstrahlung beams |
| Marc Desrosiers, Vitaly Nagy, James Puhl, Robert Glenn, Robert Densock, David Stieren, Brian Lang, Andreas Kamlowski, Diether Maier and Arthur Heiss | 759 | *e*-Calibrations: using the Internet to deliver calibration services in real time at lower cost |
| Ary de A. Rodrigues Jr. and Linda V.E. Caldas | 765 | Commercial plate window glass tested as routine dosimeter at a gamma irradiation facility |
| M. Sohrabpour, M. Hassanzadeh, M. Shahriari and M. Sharifzadeh | 769 | Dose distribution of the IR-136 irradiator using a Monte Carlo code and comparison with dosimetry |
| A. Akhavan, M. Sohrabpour and M. Sharifzadeh | 773 | Preparation of a new chemical radiochromic film dosimeter |
| A. Kovács, M. Baranyai, L. Wojnárovits, S. Miller, M. Murphy, W.L. McLaughlin, I. Slezsák and A.I. Kovács | 777 | Applicability of the Sunna dosimeter for food irradiation control |
| M. Russo, M. D'Angelantonio, E. Takács, M. Lavalle, P.G. Fuochi and S.S. Emmi | 781 | Effects of different matrixes on the dosimetric response of α-terthiophene films from the kGy to MGy range |
| C.H. Pyne and M.J. Comben | 785 | Use of validation dosimetry, in source rack load planning, to improve cobalt irradiation plant efficiency |
| J.P. Sephton, P.H.G. Sharpe and R.D.H Chu | 789 | The use of ionisation chambers for dose rate measurements at industrial irradiation plants |
| R. Bett, M.F. Watts and M.E. Plested | 793 | The shelf life of dyed polymethylmethacrylate dosimeters |
| M.F. Watts and R. Bett | 799 | A new dosimetry system using a portable reader |
| H.B. Owczarczyk, W. Migdal and W. Stachowicz | 803 | EB dose calibration for 10 MeV linear accelerator |
| S. Ebraheem, S. Eid and A. Kovacs | 807 | A new dyed poly (vinyl alcohol) film for high-dose applications |
| S. Ramos-Bernal, E. Cruz, A. Negrón-Mendoza and E. Bustos | 813 | Irradiation dose determination below room temperature |
| Liqing Xie, Jinxian Dai, Pengcheng Wang, Yinfen Zhang and Juncheng Gao | 817 | Dosimetry and application of the alanine-polymer film dosimeter |

## PACKAGING MATERIALS

| | | |
|---|---|---|
| B. Ouattara, L.T. Canh, C. Vachon, M.A. Mateescu and M. Lacroix | 821 | Use of γ-irradiation cross-linking to improve the water vapor permeability and the chemical stability of milk protein films |
| M. Lacroix, T.C. Le, B. Ouattara, H. Yu, M. Letendre, S.F. Sabato, M.A. Mateescu and G. Patterson | 827 | Use of γ-irradiation to produce films from whey, casein and soya proteins: structure and functionals characteristics |
| J. Mittendorfer, H.P. Bierbaumer, F. Gratzl and E. Kellauer | 833 | Decontamination of food packaging using electron beam—status and prospects |
| Rainer Buchalla, Timothy H. Begley and Kim M. Morehouse | 837 | Analysis of low-molecular weight radiolysis products in extracts of gamma-irradiated polymers by gas chromatography and high-performance liquid chromatography |

**Frank Welle, Alexandra Mauer** and **Roland Franz** 841 Migration and sensory changes of packaging materials caused by ionising radiation

**Lecon Woo** and **Craig L. Sandford** 845 Comparison of electron beam irradiation with gamma processing for medical packaging materials

# CONTENTS OF VOLUME 64

## Number 1

M. Ertugrul, A. Karabulut and G. Budak — 1 — Measurement of the K shell absorption jump factor of some elements

*Technical Note*

A.N. Hopersky, S.A. Novikov and V.V. Chuvenkov — 5 — Anomalous elastic scattering of linearly polarized X-ray radiation by multicharged atomic ions in the range of the ionization threshold of the 1s-shell

Z.S. Nurkeeva, G.A. Mun, S.M. Koblanov, B.B. Yermukhambetova, R.A. Abdykalykova and V.V. Khutoryanskiy — 9 — Radiation synthesis of novel cationic flocculants based on copolymers of vinyl ethers of monoethanolamine and ethyleneglycol

Ali Sadeghi, Mahnaz Chaychian, Mohamad Al-Sheikhly and W.L. McLaughlin — 13 — Radiation-induced reduction of ditetrazolium salt in aqueous solutions

Richard A. Holroyd and Masaru Nishikawa — 19 — Pressure effects on electron reactions and mobility in nonpolar liquids

T. Lundström, H. Christensen and K. Sehested — 29 — The reaction of OH with H at elevated temperatures

H. Savaş and Olgun Güven — 35 — Gelation, swelling and water vapor permeability behavior of radiation synthesized poly(ethylene oxide) hydrogels

Guillermina Burillo, Roger L. Clough, Tibor Czvikovszky, Olgun Guven, Alain Le Moel, Weiwei Liu, Ajit Singh, Jingtian Yang and Traian Zaharescu — 41 — Polymer recycling: potential application of radiation technology

Bumsoo Han, Jaein Ko, Jinkyu Kim, Yuri Kim, Wooho Chung, I.E. Makarov, A.V. Ponomarev and A.K. Pikaev — 53 — Combined electron-beam and biological treatment of dyeing complex wastewater. Pilot plant experiments

Eun-Joo Lee, Vitaly I. Volkov, Myung-Woo Byun and Cherl-Ho Lee — 61 — Detection of free radicals in gamma-irradiated soybean paste and model system by electron spin resonance spectroscopy

Young Chang Nho, Oh Hyun Kwon and Chen Jie — 67 — Introduction of phosphoric acid group to polypropylene film by radiation grafting and its blood compatibility

## Number 2

P. Andrew Karam — 77 — Terrestrial radiation exposure from supernova-produced radioactivities

Akira Iwasaki — 89 — A method for 10 MV X-ray scatter dose-spread kernel construction based on the Bjärngard scatter factor formulation

Manmohan Kumar — 99 — Study of formation of aqueous Tl, Cu and Cd clusters by γ- and electron irradiation

H.B. Ambroz, T.J. Kemp, E. Kornacka and G. Przybytniak — 107 — The influence of dithiothreitol on DNA radiolysis in frozen aqueous solution: an EPR study

Mitsumasa Taguchi, Masahiro Moriyama, Hideki Namba and Hiroshi Hiratsuka — 115 — Yield of acridine C-radical produced by irradiation with energetic heavy ions

G.R. Dey, P. Dwibedy, D.B. Naik and K. Kishore — 123 — Nature of the transient species formed by the reactions of reducing radicals with 2- and 3-aminopyridines: A pulse radiolysis study

Sadhan K. Chaudhuri — 131 — A simple and reliable method to detect gamma irradiated lentil (*Lens culinaris* Medik.) seeds by germination efficiency and seedling growth test

Krystyna Cieśla and Ann-Charlotte Eliasson — 137 — Influence of gamma radiation on potato starch gelatinization studied by differential scanning calorimetry

R.O. Mazzei, E. Smolko, A. Torres, D. Tadey, C. Rocco, L. Gizzi and S. Strangis — 149 — Radiation grafting studies of acrylic acid onto cellulose triacetate membranes

## Number 3

Tatsuo Tabata, Vadim Moskvin, Pedro Andreo, Valentin Lazurik and Yuri Rogov — 161 — Extrapolated ranges of electrons determined from transmission and projected-range straggling curves

| | | |
|---|---|---|
| A.N. Hopersky | 169 | Quantum theory of the effect of post-collision interaction on the absorption of X-ray photons by a deep atomic shell |
| Indra J. Das, Vadim P. Moskvin, Alireza Kassaee, Tatsuo Tabata and Frank Verhaegen | 173 | Dose perturbations at high-$Z$ interfaces in kilovoltage photon beams: comparison with Monte Carlo simulations and measurements |
| G. Vázquez-Polo, H. López Valdivia, H. Carrasco Abrego, R.R. Mijangos and R. García G | 181 | Calculation of absorbed dose of low-energy electron beam by an approximate method |
| Robert H. Schuler and Guadalupe Albarran | 189 | The rate constants for reaction of $^{\bullet}OH$ radicals with benzene and toluene |
| Jan P. Suwalski and Jerzy Kroh | 197 | Dynamics of the blue shift of $e_{tr}^{-}$ optical absorption spectra in ethanol–water glasses |
| Fariborz Taghipour and Greg J. Evans | 203 | Modeling of iodine radiation chemistry in the presence of organic compounds |
| Kanjiro Torigoe, Hynd Remita, Patricia Beaunier and Jacqueline Belloni | 215 | Radiation-induced reduction of mixed silver and rhodium ionic aqueous solution |
| Xuewu Ge, Yonghong Ni and Zhicheng Zhang | 223 | A novel route to prepare cadmium sulfide nano-rods |
| Wei Huang, Fu Yibei, Wang Chaoyang, Xu Yunshu and Bian Zhishang | 229 | A study on radiation resistance of siloxane foam containing phenyl |
| V. Múčka, R. Silber, M. Pospšil, M. Čamra and B. Bartonček | 235 | Radiation dechlorination of DELOR 106 and DELOR 103 and influence of active carbon and cupric oxide on this process |
| Myung-Woo Byun, Jun-Ho Son, Hong-Sun Yook, Cheorun Jo and Dong-Ho Kim | 245 | Effect of gamma irradiation on the physiological activity of Korean soybean fermented foods, *Chungkookjang* and *Doenjang* |

## Number 4

| | | |
|---|---|---|
| D.A. Bradley | 249 | Editorial |
| M.K. Raghavendra, Syed Azeez, C.R. Ramaswamy, T.K. Umesh and Ramakrishna Gowda | 251 | Study of 1s internal bremsstrahlung spectrum from $^{57}Co$ |
| A.Yu. Kuznetsov, A.E. Shikanov and A.S. Tsybin | 257 | A method for accurate measuring of yield parameters for neutron generators having complex targets |
| A. Hirose | 261 | On transition radiation II |
| Omar S. Desouky, Ahmed H. Ashour, Mohamed I. Abdullah and Wael M. Elshemey | 267 | Low-angle X-ray scattering from spices |
| Elias Hanna Bakraji, Numan Salman and Ibrahim Othman | 277 | Radiation-induced polymerization of acrylamide within Okoume (*Aucoumea klaineana pierre*) |
| Debarshi Gangopadhyay, Bichitra Ganguly and Binayak Dutta-Roy | 283 | Temperature, pressure and solvent dependence of positronium acceptor reactions |
| Huai-Bin Shi, Chun-Lin Shao and Zeng-Liang Yu | 289 | The preliminary study on the chemical synthesis between graphite and water by glow-discharge experiments |
| Jun Kumagai, Mitsuo Nakama, Tetsuo Miyazaki, Tamaki Ise, Seiji Kodama and Masami Watanabe | 293 | Scavenging of long-lived radicals by (−)-epigallocatechin-3-*O*-gallate and simultaneous suppression of mutation in irradiated mammalian cells |
| Sheila Devasahayam, David J.T. Hill, Peter J. Pomery and Andrew K. Whittaker | 299 | The radiation chemistry of ultem at 77 K as revealed by ESR spectroscopy |
| Ju.-Woon Lee, Kyung.-Hwan Cho, Hong.-Sun Yook, Cheorun Jo, Dong.-Ho Kim and Myung.-Woo Byun | 309 | The effect of gamma irradiation on the stability and hygienic quality of semi-dried Pacific saury (*Cololabis seira*) flesh |
| Dong-Ho Kim, Cheorun Jo, Hong-Sun Yook, Byoung-Jun Park and Myung-Woo Byun | 317 | Enhancement of preservation characteristics of *Meju*, an intermediate material for Korean legume-based fermented soy sauce, *Kanjang*, by irradiation |
| M. Paula Esteves, Anabela Raymundo, Isabel de Sousa, M. Eduarda Andrade and José Empis | 323 | Rheological behaviour of white pepper gels—a new method for studying the effect of irradiation |

Kouichi Sutani, Isao Kaetsu, Kumao Uchida and Yoshio Matsubara 331 Stimulus responsive drug release from polymer gel. Controlled release of ionic drug from polyampholyte gel

**Numbers 5–6**

Lino Miramonti 337 Study of the nuclear recoil response of a NaI(Tl) scintillator detector with a $^{252}Cf$ neutron source

Omer Sogut, Erdoğan Büyükkasap and Hasan Erdoğan 343 Chemical-effect variation of $K\beta/K\alpha$ X-ray intensity ratios in 3d elements

Masood Iqbal, Nasir M. Mirza and Sikander M. Mirza 349 Experimental study of effect of void volume fraction on neutron diffusion parameters in water

J. Reyes-Gasga and R. García-García 359 Analysis of the electron-beam radiation damage of TEM samples in the acceleration energy range from 0.1 to 2 MeV using the standard theory for fast electrons

*Technical note*

J.M. Chatterjee, M. Sarkar, S. Roy and K. Weidenbrü 369 Determination of heavy metals in industrial wastes by SXRF method

*Book review*

J.M. Robin Hutchinson 373 Radioactivity in the Environment: Volume I, Plutonium in the Environment A. Kudo (Ed.); Elsevier, Amsterdam, 2001, Hardbound, 464 p., price 155, ISBN 0-08-043428-8

Yutaka Ito 375 Transition properties of PET observed by CL and PALS

Ewa Szajdzinska-Pietek 381 Third International Workshop on the Structure of Oxygen Radicals in Irradiated Solids, SORIS 2001, Nieborow, Poland, May 19–23, 2001

Maurcio Braga de Araújo, Nelson Moreira Pinhal and Ney Vernon Vugman 389 EPR spectroscopy on irradiated nickel tetracyanide in NaCl host lattice: mechanism for the simultaneous formation of reduced and oxidized species

G.R. Dey, D.B. Naik, P. Dwibedy and K. Kishore 395 Reactions of oxidizing radicals with 2- and 3-aminopyridines: a pulse radiolysis study

Anna L. Fantola-Lazzarini and Ennio Lazzarini 403 On the positronium spin conversion reactions caused by some macrocyclic $Co^{II}$ complexes

John B. Kowalski, Craig Herring, Lisa Baryschpolec, John Reger, Jay Patel, Mary Feeney and Alan Tallentire 411 Field evaluations of the $VD_{max}$ approach for substantiation of a 25 kGy sterilization dose and its application to other preselected doses

Siriwattana Banchorndhevakul 417 Effect of urea and urea–gamma treatments on cellulose degradation of Thai rice straw and corn stalk

Diana I. Martin, Elena Mateescu, Gabriela Craciun, Daniel Ighigeanu and Adelina Ighigeanu 423 Polymeric flocculants processing by accelerated electron beams and microwave heating

H.M. Dahlan, M.D. Khairul Zaman and A. Ibrahim 429 Liquid natural rubber (LNR) as a compatibiliser in NR/LLDPE blends—II: the effects of electron-beam (EB) irradiation

# CONTENTS OF VOLUME 65

## Number 1

## RADIATION PHYSICS

| | | |
|---|---|---|
| **Akintunde Akangbe Okunade** | 1 | Numerical models for comparing filter materials for diagnostic radiology |
| **Akira Iwasaki** | 11 | 10 MV X-ray central-axis dose calculation in thorax-like phantoms (water/cork) using the differential primary and scatter method |
| **Ö. Şimşek, M. Ertugrul, D. Karagöz, G. Budak, A. Karabulut, S. Yılmaz, O. Doğan, Ü. Turgut, Ö. Söğüt, R. Polat** and **A. Gürol** | 27 | K shell fluorescence yields for elements with $33 \leqslant Z \leqslant 53$ using 59.5 keV photons |
| **Ahmet Cengiz** | 33 | Approximate inelastic scattering cross sections of electrons |

## RADIATION CHEMISTRY

| | | |
|---|---|---|
| **Ken-ichi Kowari** | 45 | An analysis of the electron average energies in $H_2$ gas and $D_2$ gas using multi-term exponential fitting |
| **V. Wasselin-Trupin, G. Baldacchino, S. Bouffard** and **B. Hickel** | 53 | Hydrogen peroxide yields in water radiolysis by high-energy ion beams at constant LET |
| **D. Martin, D. Ighigeanu, E. Mateescu, G. Craciun** and **A. Ighigeanu** | 63 | Vulcanization of rubber mixtures by simultaneous electron beam and microwave irradiation |

## RADIATION PROCESSING

| | | |
|---|---|---|
| **Grigoriy A. Mun, Zauresh S. Nurkeeva, Vitaliy V. Khutoryanskiy, Aibek D. Sergaziyev** and **Janusz M. Rosiak** | 67 | Radiation synthesis of temperature-responsive hydrogels by copolymerization of [2-(methacryloyloxy)ethyl]trimethylammonium chloride with *N*-isopropylacrylamide |
| **A.V. Ponomarev, I.E. Makarov, N.R. Saifullin, A.Sh. Syrtlanov** and **A.K. Pikaev** | 71 | Electron-beam radiolysis of gaseous propane in the presence of water under circulation conditions |
| **Dianxing Wu, Qingyao Shu, Zhonghua Wang** and **Yingwu Xia** | 79 | Effect of gamma irradiation on starch viscosity and physicochemical properties of different rice |
| **Zhen Wang, Pengyang Deng, Jiazhen Sun** and **Mengxian Ding** | 87 | Improvement of mechanical property of polyimide blends with $^{60}Co$-irradiation |
| **S. Das, A. Bhattacharya, P.C. Mandal, M.C. Rath** and **T. Mukherjee** | 93 | One-electron reduction of 1,2-dihydroxy-9,10-anthraquinone and some of its transition metal complexes in aqueous solution and in aqueous isopropanol–acetone-mixed solvent: a steady-state and pulse radiolysis study |

## CORRIGENDUM

| | | |
|---|---|---|
| **Mitsumasa Taguchi, Masahiro Moriyama, Hideki Namba** and **Hiroshi Hiratsuka** | 101 | Corrigendum to "Yield of acridine C-radical produced by irradiation with energetic heavy ions" [Radiat. Phys. Chem. 64 (2002) 115–122] |

## ERRATUM

| | | |
|---|---|---|
| **H.M. Khan, Ijaz A. Batti** and **Henry Delincée** | 103 | Erratum to "Thermoluminescence of contaminating minerals for the detection of radiation treatment of dried fruits" [Radiation Physics and Chemistry 63 (2002) 403–406] |

Number 2

## RADIATION PHYSICS

| | | |
|---|---|---|
| José Mario Saca and Carlos Peralta | 105 | Relativistic gravitational deflection of photons |
| Alan Owens, G.W. Fraser and S.J. Gurman | 109 | Near K-edge linear attenuation coefficients for Si, $SiO_2$ and $Si_3N_4$ |
| M. Ertugrul | 123 | Measurement of $L_1$ subshell photoionization cross-sections of W, Au and Bi at 31.6 keV |
| Peter Kozma, Robert Bajgar and Petr Kozma Jr. | 127 | Radiation damage of $PbWO_4$ crystals due to irradiation by $^{60}Co$ gamma rays |
| *Book review* | | |
| John H. Hubbell | 131 | Physics for Radiation Protection James E. Martin; Wiley, New York and Chichester, 2000, ISBN 0-471-35373-6, xvi+713 pp.; hard cover; alk paper, 150.00. |

## RADIATION CHEMISTRY

| | | |
|---|---|---|
| Marek Kozicki, Piotr Kujawa and Janusz M. Rosiak | 133 | Pulse radiolysis study of diacrylate macromonomer in aqueous solution |
| L. Distel, B. Distel and H. Schüssler | 141 | Formation of DNA double-strand breaks and DNA–protein crosslinks by irradiation of DNA in the presence of a protein |
| Tetsuo Miyazaki, Akiyuki Morikawa, Jun Kumagai, Masateru Ikehata, Takao Koana and Shoshi Kikuchi | 151 | Long-lived radicals produced by γ-irradiation or vital activity in plants, animals, cells, and protein solution: their observation and inhomogeneous decay dynamics |
| Giovanna Pitarresi, Mariano Licciardi, Emanuela Fabiola Craparo, Elio Calderaro, Giuseppe Spadaro and Gaetano Giammona | 159 | Microgels of polyaspartamide and poly(ethylene glycol) derivatives obtained by γ-irradiation |

## RADIATION PROCESSING

| | | |
|---|---|---|
| R.F. Zaykina and Yu.A. Zaykin | 169 | Radiation technologies for production and regeneration of motor fuel and lubricants |
| Zhao Zhudi, Yu Wenxue and Chen Xinfang | 173 | Study on increase in crystallinity in γ-irradiated poly(vinylidene fluoride) |
| V. Múčka, B. Otáhal and R. Silber | 177 | Catalytic activity of NiO–ZnO-mixed catalysts prepared from solid oxide of one component and nitrate solution of another one in $H_2O_2$-decomposition before and after their irradiation |
| Eric Marchioni, Jean-Yves Pabst and Florent Kuntz | 187 | Characterization and application of two kinds of ESR dosimeters |

Number 3

## RADIATION PHYSICS

| | | |
|---|---|---|
| C.K. Bhat | 193 | Estimation of gallium in a bauxite-ore deposit using an energy-dispersive X-ray fluorescence technique |
| Yüksel Özdemir, Rıdvan Durak and Elif Öz | 199 | $K$-shell X-ray production cross-sections and fluorescence yields in some medium-$Z$ elements |
| M. Ertugrul and Ö. Şimşek | 205 | Determination of $L_2$ and $L_3$ subshell fluorescence yields of some elements in the atomic number range $22 \leqslant Z \leqslant 62$ |
| G.K. Sandhu, Kulwant Singh, B.S. Lark and L. Gerward | 211 | Molar extinction coefficients of some fatty acids |
| M.L. Mallikarjuna, S.B. Appaji Gowda, R. Gowda and T.K. Umesh | 217 | Studies on photon interaction around the K-edge of some rare-earth elements |

## RADIATION CHEMISTRY

Anjali Acharya, H. Mohan and S. Sabharwal 225 Radiation induced polymerization and crosslinking behavior of *N*-hydroxy methyl acrylamide in aqueous solutions

M. Miesch, L. Miesch, P. Horvatovich, D. Burnouf, H. Delincée, A. Hartwig, F. Raul, D. Werner and E. Marchioni 233 Efficient reaction pathway for the synthesis of saturated and monounsaturated 2-alkylcyclobutanones

Zhixiang Zhou, Suping Qian, Side Yao and Zhiyi Zhang 241 Electron transfer in colloidal $TiO_2$ semiconductors sensitized by hypocrellin A

Zauresh S. Nurkeeva, Al-Sayed Abdel Aal, Vitaliy V. Khutoryanskiy, Grigoriy A. Mun and Sabit M. Koblanov 249 Radiation grafting of vinyl ether of monoethanolamine on polyethylene films

E. Janata 255 A pulse generator for xenon lamps

## RADIATION PROCESSING

Sudip Ray and Anil K. Bhowmick 259 Electron-beam-modified surface-coated clay: influence on mechanical, dynamic mechanical and rheological properties of ethylene–octene copolymer

N.D. Yordanov, V. Gancheva and E. Georgieva 269 EPR and UV spectroscopic study of table sugar as a high-dose dosimeter

M. Shamma and M.A. Al-Adawi 277 The morphological changes of *Ascaris lumbricoides* ova in sewage sludge water treated by gamma irradiation

Douglas E. Weiss and Douglas S. Dunn 281 Pulsed polymerization of acrylate monomers using electron beam. Conditions for achieving single-phase heterogeneous polymerization

Z. Zare, M. Sohrabpour, T.Z. Fazeli and K.G. Kohan 289 Evaluation of invertase (B-fructo furanosidase) activity in irradiated Mazafaty dates during storage

C. Oliveira, L.M. Ferreira, I.F. Gonçalves and J. Salgado 293 Monte Carlo studies of the irradiator geometry of the Portuguese Gamma Irradiation Facility

### Numbers 4–5

## BASE SCIENCE

Roman Flyunt, Oksana Makogon and Klaus-Dieter Asmus 299 Some new aspects in the chemistry of halogenated oxyl and peroxyl radicals

D. Ransom Hardison, William J. Cooper, Stephen P. Mezyk and David M. Bartels 309 The free radical chemistry of *tert*-butyl formate: rate constants for hydroxyl radical, hydrated electron and hydrogen atom reaction in aqueous solution

Heather D. Johnson, William J. Cooper, Stephen P. Mezyk and David M. Bartels 317 Free radical reactions of monochloramine and hydroxylamine in aqueous solution

Jason A. Williams, William J. Cooper, Stephen P. Mezyk and David M. Bartels 327 Absolute rate constants for the reaction of the hydrated electron, hydroxyl radical and hydrogen atom with chloroacetones in water

Taixing Wu, Vivian Cruz, Stephen Mezyk, William J. Cooper and Kevin E. O'Shea 335 Gamma radiolysis of methyl *t*-butyl ether: a study of hydroxyl radical mediated reaction pathways

Kevin E. O'Shea, Duk Kyung Kim, Taixing Wu, William J. Cooper and Stephen P. Mezyk 343 The degradation of MTBE–BTEX mixtures by gamma radiolysis. A kinetic modeling study

Virender K. Sharma 349 Ferrate(V) oxidation of pollutants: a premix pulse radiolysis study

M. Trojanowicz, P. Drzewicz, P. Pańta, W. Głuszewski, G. Nałecz-Jawecki, J. Sawicki, M.H.O. Sampa, H. Oikawa, S.I. Borrely, M. Czaplicka and M. Szewczyńska 357 Radiolytic degradation and toxicity changes in γ-irradiated solutions of 2,4-dichlorophenol

| | | |
|---|---|---|
| **Charles N. Kurucz, Thomas D. Waite, Suzana E. Otaño, William J. Cooper** and **Michael G. Nickelsen** | 367 | A comparison of large-scale electron beam and bench-scale $^{60}Co$ irradiations of simulated aqueous waste streams |
| **Peter Gehringer** and **Helmut Eschweiler** | 379 | The dose rate effect with radiation processing of water—an interpretative approach |
| **Ermin Katrin Winarno** and **Nikola Getoff** | 387 | Comparative studies on the degradation of aqueous 2-chloroaniline by $O_3$ as well as by UV-light and $\gamma$-rays in the presence of ozone |

## GAS PHASE STUDIES

| | | |
|---|---|---|
| **A.G. Chmielewski, Yongxia Sun, Z. Zimek, S. Bułka** and **J. Licki** | 397 | Mechanism of $NO_x$ removal by electron beam process in the presence of scavengers |
| **O.L. Fainchtein, M.V. Sagaidak** and **V.V. Morgunov** | 405 | On problems of reducing energy consumption for irradiation of flue gas in the electron beam gas treatment technology |
| **Koichi Hirota, Teruyuki Hakoda, Hidehiko Arai** and **Shoji Hashimoto** | 415 | Electron-beam decomposition of vaporized VOCs in air |
| **H. Nichipor, E. Dashouk, S. Yacko, A.G. Chmielewski, Z. Zimek** and **Y. Sun** | 423 | Chlorinated hydrocarbons and PAH decomposition in dry and humid air by electron beam irradiation |
| **Jo-Chun Kim** | 429 | Factors affecting aromatic VOC removal by electron beam treatment |

## DRINKING WATER TREATMENT

| | | |
|---|---|---|
| **Nikola Getoff** | 437 | Factors influencing the efficiency of radiation-induced degradation of water pollutants |
| **Winarti Andayani** and **Agustin N.M. Bagyo** | 447 | Radiation-induced decomposition and decolorization of water in aerated solutions |
| **William J. Cooper, Michael G. Nickelsen, Stephen P. Mezyk, Greg Leslie, Paul M. Tornatore, Wayne Hardison** and **Paris A. Hajali** | 451 | MTBE and priority contaminant treatment with high energy electron beam injection |

## PCB TREATMENT IN TRANSFORMER OIL

| | | |
|---|---|---|
| **Bruce J. Mincher, Richard R. Brey, Rene' G. Rodriguez, Scott Pristupa** and **Aaron Ruhter** | 461 | Increasing PCB radiolysis rates in transformer oil |
| **Ajit Singh** and **Walter Kremers** | 467 | Radiolytic dechlorination of polychlorinated biphenyls using alkaline 2-propanol solutions |
| **Mahnaz Chaychian, Cynthia Jones, Dianne Poster, Joseph Silverman, Pedatsur Neta, Robert Huie** and **Mohamad Al-Sheikhly** | 473 | Radiolytic dechlorination of polychlorinated biphenyls in transformer oil and in marine sediment |

## MISCELLANEOUS

| | | |
|---|---|---|
| **L.I. Trakhtenberg, G.N. Gerasimov, L.N. Aleksandrova** and **V.K. Potapov** | 479 | Photo and radiation cryochemical synthesis of metal–polymer films: structure, sensor and catalytic properties |
| **Vladimir I. Vysotskii, Anatolii A. Pinchuk, Alla A. Kornilova** and **Igor I. Samoylenko** | 487 | Molecular mechanisms and time-dependent dynamics of hormesis, antagonism and radioprotective effects at combined ionizing irradiation of biological systems |
| **M.J. Anjos, R.T. Lopes, E.F.O. Jesus, J.T. Assis, R. Cesareo, R.C. Barroso** and **C.A.A. Barradas** | 495 | Elemental concentration analysis in soil contaminated with recyclable urban garbage by tube-excited energy-dispersive X-ray fluorescence |
| **R.C. Barroso, M.J. Anjos, R.T. Lopes, E.F.O. de Jesus, D. Braz, C.R.F. Castro** and **A. Uhl** | 501 | Analysis of matrix characterization by X-ray diffraction and synchrotron radiation |

Lisa Marsili, Steven Espie, John G. Anderson and Scott J. MacGregor 507 Plasma inactivation of food-related microorganisms in liquids

## DOMESTIC WASTEWATER TREATMENT

A.K. Pikaev 515 New data on electron-beam purification of wastewater

A.A. Basfar and F. Abdel Rehim 527 Disinfection of wastewater from a Riyadh Wastewater Treatment Plant with ionizing radiation

Jinho Jung, Jeong-Hyo Yoon, Hung-Ho Chung and Myun-Joo Lee 533 Radiation treatment of secondary effluent from a sewage treatment plant

## INDUSTRIAL WASTEWATER TREATMENT

Hang-Sik Shin, Yu-Ri Kim, BumSoo Han, Igor E. Makarov, Alexandr V. Ponomarev and Alexei K. Pikaev 539 Application of electron beam to treatment of wastewater from paper-mill

Dilek Şolpan and Olgun Güven 549 Decoloration and degradation of some textile dyes by gamma irradiation

## SITE REMEDIATION/GROUNDWATER TREATMENT

Song Weihua, Zheng Zheng, Abual-Suud Rami, Zhou Tao and Hang Desheng 559 Degradation and detoxification of aqueous nitrophenol solutions by electron beam irradiation

Yongke He, Jun Liu, Yingdong Lu and Jilan Wu 565 Gamma radiation treatment of pentachlorophenol, 2,4-dichlorophenol and 2-chlorophenol in water

William J. Cooper, Michael G. Nickelsen, Richard V. Green and Stephen P. Mezyk 571 The removal of naphthalene from aqueous solutions using high-energy electron beam irradiation

Michael G. Nickelsen, William J. Cooper, David A. Secker, Louis A. Rosocha, Charles N. Kurucz and Thomas D. Waite 579 Kinetic modeling and simulation of PCE and TCE removal in aqueous solutions by electron-beam irradiation

### Number 6

## RADIATION PHYSICS

Surajit Pal, G. Muthukrishnan, R. Ravishankar, R.P. Sharma and A.M. Ghose 589 Estimation of percentage depth dose distributions for therapeutic machines

Akira Iwasaki 595 Comments on the primary and scatter dose-spread kernels used for convolution methods

## RADIATION CHEMISTRY

Ruomei Gao, Agnes Safrany and Joseph Rabani 599 Fundamental reactions in $TiO_2$ nanocrystallite aqueous solutions studied by pulse radiolysis

M. Sánchez, H. Wolfger and N. Getoff 611 Radiation-induced degradation of 4-chloroaniline aqueous solution

## RADIATION PROCESSING

M.C. Saylor, J.P. Connaghan, S.C. Yeadon, C.M. Herring and T.M. Jordan 621 Design and application of process control charting methodologies to gamma irradiation practices

Sudip Ray, Anil K. Bhowmick, K.S.S. Sarma, A.B. Majali and V.K. Tikku 627 Characterization of electron-beam-modified surface coated clay fillers and their influence on physical properties of rubbers

**P.N. Kotiyan, P.R. Vavia, Y.K. Bharadwaj, S. Sabarwal** and **A.B. Majali** 641 Electron beam processed transdermal delivery system for administration of an anti-anginal agent

**Vol 63, 64, 65 Contents Index** V

**Vol 63, 64, 65 Author Index** XXV
